Argentina spark building energy solutions

Commercial building owners are under the tremendous pressure managing day-to-day operations and are looking for ways to fund the energy projects that (1) uphold the health and safety of the employees, (2) improve comfort and (3) increase the company"s bottom line, year after year. ... Our Best Solutions. Advanced Technology. Expert Engineers ...

Auditing your building"s energy usage is large step to building a solid plan for improving energy efficiency. If you go without an energy audit, you may be spending more money than you think on projects improving your building"s energy efficiency but, in fact, they really aren"t.

Argentina is situated unlike most of the world in that it"s history in both resilience and creativity, furrows the field in which technology and capital can succeed. Not all bad, economic instability often forces governments to address critical infrastructure needs, and in Argentina, energy independence became a key focus.

Spark Building Energy Solutions can assist building owners and corporations in: 1. Reducing the business" operational demand through energy audits and implementing energy efficient upgrades. 2. Renewable onsite generation with solar and battery storage 3. Adopting energy storage solutions to reduce peak demand and in-demand response strategies
