

How many homes can a solar farm power in Jersey?

The solar farms would produce enough energy to power nearly 1,200 homes in Jersey, said JE. Land earmarked for the siting of the panels would continue to be used for grazing and growing crops, it said. The company is holding a community consultation from 10:00 to 20:00 BST at St Mary's Parish Hall where people can view the site plans.

What do people in Jersey think about solar farms?

Jersey Electricity (JE) is asking people in St Mary what they think about proposals for two solar farms. The solar farms would produce enough energy to power nearly 1,200 homes in Jersey, said JE. Land earmarked for the siting of the panels would continue to be used for grazing and growing crops, it said.

Could St Clement be Jersey's first ground-mounted solar farm?

Land south of Rue du Moulin à Vent, St Clement, could be the site for Jersey's first ground-mounted solar farm if plans by Jersey Electricity get the go-ahead.

How much power will Jersey's New solar array generate?

At 2,500 square metres array and 521 kWp the array is twice the size of the Woodside Farm array and is expected to generate 530,000 units a year. That's enough to power 72 Jersey homes using an average of 7,300 units a year.

Should a solar farm be built in St Clement?

Planning approval has been granted for a solar farm in St Clement and an application has been submitted for a site at Sorel. The National Trust objected to the Sorel site on the grounds that it would have a "substantial adverse effect" on the area.

Will a utility increase on-island solar photovoltaic (PV) generation?

The utility company is looking to raise the amount of on-Island solar photovoltaic (PV) generation as part of its strategy to increase diversity in on-island electricity generation by installing approximately 4 MWp of ground solar PV in the area.
