

Is this the air pressure in your air bladder of the well tank? If so it should be 2 psi below the cut in pressure. Typically for a well pump with a 30/50 pressure switch you'd have 28 psi in the tank ...

I have a WR-120 33 gallon tank. The cut on/off listed on the switch is 40/60. The gauge is currently reading 59. When I use a tire pressure gauge I get a reading of 56.5. Shouldn't the ...
