

Accelerated innovation: Liquid cooling solutions Schneider Electric and Motivair unveiled a game-changing, end-to-end liquid cooling portfolio. Purpose-built for new sites and retrofits, these ...

Water-cooled electric motors have a wide range of applications, most of which benefit from the use of aluminum extrusion housing. Examples of these industries are textile, mining, marine, ...

Each cold plate has critical characteristics that provide precision mounting to the chip, optimized cooling geometries that provide maximum cooling at the lowest pressure drop, and the ability ...

A stainless steel direct liquid contact microchannel cold plate is investigated for the thermal management of bare die packages. Experiments are conducted for a prototype microchannel ...
