

AlsoEnergy offers a fully vertically-integrated utility monitoring and controls solution that meets stringent utility standards. Our vertical integration ensures hardware and software compatibility, while also enabling you to work with one vendor for all your utility SCADA and PPC needs for faster time to data, easy installation, and expedited commissioning.

Aso Cooperativa de Ahorro y Credito, San Salvador. 999 likes &#183; 1 talking about this. Asociaci&#243;n cooperativa de Ahorro y Cr&#233;dito en El Salvador. Empresa certificada de cr&#233;dito y servicios financieros,...

EDP is a transformative investment in El Salvador's clean energy future. The project is delivering approximately 30% of the country's energy demand with clean power and has modified the Salvadoran energy matrix by incorporating natural gas for generation and other uses, reducing the country's reliance on diesel and heavy fuel oil-fired power generation.

The National Energy Policy to 2024 of El Salvador guides the national actions on energy, following main principles: ensure high quality level and continuous and affordable energy access, decrease fossil fuel dependency and mitigate environmental and social

The boost given to renewable sources and the different investments that will be made this year, the sector will close the year with a growth of more than 10%. El Salvador continues to be a reference in renewable energy generation in the region, said the president of the Salvadoran Association of Industrialists (ASI), Jorge Arriza,

Stem has also agreed to provide smart energy storage solutions to AlsoEnergy's existing front-of-meter, commercial and industrial customers. The transaction is expected to benefit AlsoEnergy by giving the company better visibility in the solar and storage project segments through Stem's customer and partner network.

From our edge solutions to our cloud application, AlsoEnergy's full-stack technology platform meets all your needs for monitoring, managing, and monetizing your growing clean energy portfolio.

La DGEHM señaló que, durante el año pasado, en El Salvador se consumieron 7,100 Gigavatios-hora aproximadamente, cantidad que se espera duplicar en el 2050 con la incorporación de la energía nuclear en la matriz energética, lo que podrá representar el 26 % de la generación del país.

With more and more large-scale solar PV projects being built and energizing substantial renewable energy for communities, it's important to understand the compliance requirements for these projects; this includes compliance with North American Electric Reliability Corporation (NERC) standards, which is essential when developing, owning, or managing a solar PV project.

Towards sustainable energy, El Salvador is set to embrace a future dominated by renewable projects, contributing to the region's ambitious target of 95% renewable energy by 2024. According to the Latin American Energy Organization (Olade), this surge in green energy initiatives will revolutionize the energy landscape of the country.
