

Who are Athos Service GmbH?

This article is more than 3 years old. In a small Family Office in Munich sit two brothers who have helped saved millions of lives, boosted Germany's economy and enabled nations, across the world, to re-open in the middle of a pandemic. The Family Office we refer to in this article is Athos Service GmbH.

Can E-methanol be made in South Africa?

Earth and Wire, ENERTRAG South Africa and 24 Solutions are developing a greenfield facility to manufacture zero-carbon e-methanol for sale locally and internationally.

Who is enertrag South Africa?

ENERTRAG South Africa, the domestic unit of a German renewable energy and green-hydrogen company, will be responsible for the green hydrogen and e-methanol synthesis and business case manager Jonathan Metcalfe argues that the project further underlines the company's support for the development of South Africa's hydrogen economy.

Is E-methanol a good investment in South Africa?

The consortium notes that e-methanol will be attractive in the European market, owing to its zero-carbon footprint and the continent's net-zero commitments. In South Africa, meanwhile, where there is currently no e-methanol supply, it believes that there is also a market and a willingness to pay a premium for the product.

Who is sourcing e-methanol in South Africa?

Biomass sourcing and commercial offtake will be overseen by 24Solutions, which is also expected to absorb a significant portion of the e-methanol in its own telecommunications fuel-cell network, which is already deployed across South Africa.

Is South Africa a leading producer of green hydrogen?

The project is also in line with government's ambition to position South Africa as a leading global producer of green hydrogen and green hydrogen derivatives.

South Africa's first public battery storage tender has awarded preferred bidder status to a consortium of CIP-owned Mulilo and renewables major EDF for three battery projects totalling 257MW/1,028MWh.
