

Will Australia add more rooftop solar systems?

Australia has the potential to add four million more rooftop solar systems (or 26.4 gigawatts) this decade - by making better use of available rooftop space on owner-occupied homes, social housing and businesses.

What is the Australian Solar Drive?

The Aussie Solar Drive can double the number of solar systems on Australian rooftops by bringing solar and storage to social housing, rolling out more community-scale batteries, helping more businesses go solar, and making sure all new rooftops have solar panels.

Will solar energy contribute to Australia's electricity generation?

According to the Australian Energy Market Operator (AEMO), solar energy is projected to contribute a substantial share of Australia's electricity generation in the upcoming years.

How can Australia make solar energy more affordable?

Australia's government has strategically implemented various incentives and subsidies, such as the Small-scale Renewable Energy Scheme (SRES) and the Large-scale Renewable Energy Target (LRET), to make solar installations more accessible and financially viable for its citizens.

How many people in Australia have solar panels?

Nationally, almost four million households and businesses have solar panels. The continued rise of rooftop solar across the country has been a remarkable success story, with Australia the clear global leader in the adoption of the technology. It's believed about one in every three WA households has a solar system. (ABC News: Glyn Jones)

Does Australia have a solar industry?

Over the past decade, Australia's solar industry has grown from strength to strength. More than 300,000 systems are installed each year, and some of the largest businesses in Australia have gone solar including Woolworths, IKEA, Bunnings and ALDI.
