

Who owns Eswatini electricity?

At present, the state-owned Eswatini Electricity Company (EEC) holds a majority share in Eswatini's energy market. Tasked with the generation, transmission, and distribution of electricity within the country, the EEC operates three hydropower plants and one diesel power plant, with a combined capacity of approximately 70 megawatts (MW).

What makes Eswatini an energy master plan?

A crucial element of the Energy Master Plan is the progression of solar power projects. Blessed with abundant solar resources and an average solar irradiation of roughly 5.5 kWh/m²/day, Eswatini presents an optimal site for solar power generation.

What is the main energy source in Eswatini?

Hydroelectric power currently stands as one of the most prominent energy sources in Eswatini. The EEC operates four hydropower plants, constituting 15% of the country's electricity production and plans to bolster the existing infrastructure.

Will Eswatini achieve its energy goals by 2034?

Through sustained investment in solar, wind, and biomass projects, Eswatini stands poised to emerge as a regional pioneer in renewable energy and fulfil its ambitious energy goals by 2034.

What is Eswatini's energy revolution?

Eswatini's energy revolution is a testament to its dedication to sustainability and self-sufficiency. As Eswatini strides into the future with renewable energy, the convergence of local innovation, international collaboration and growth-oriented policies promises to illuminate every corner of the nation.

Is Eswatini a sustainable country?

A nation that has long relied on neighboring South Africa and Mozambique for unsustainable fossil fuel-based electricity imports, renewable energy in Eswatini is quickly diversifying. The transformative journey culminated at the COP26 conference, where Eswatini committed to an ambitious 50% surge in renewable energy production by 2030.

The evolution of Eswatini's energy in renewable sector bears the potential for significant national benefits, including enhanced energy security, reduced import dependency, and diminished greenhouse gas emissions.

These efforts not only aim to secure Eswatini's energy landscape but also provide significant climate action benefits. They align with the country's climate pledge under the Paris Agreement, or Nationally Determined ...

We have been active in Eswatini since 1977, where we market products and services to our business

customers. We are actually the third-largest retailer in the country. Want to work in the energy industry? We represent more than ...

To electrify the whole population, Eswatini initiated the Partnership for Affordable Renewable Energy in Swaziland (PARES) in 2018. Through public-private partnerships (PPPs), PARES aims to promote ...

Our technical expertise in the power industry is well recognised energy player especially in the Kingdom of Eswatini and SADC region. Home; Domestic . Tariffs . S10 -- Life Line (0-75kWh) ...

o To strive to provide all households with access to modern energy by 2030. o To develop 40 MW Solar PV and 40 MW Biomass project by 2024 o To ensure energy security by 2026 (baseload ...
