

How has Cabo Verde changed Cape Verde's energy supply?

Cabo Verde has transformed Cape Verde's energy supply, offsetting diesel imports by around 15 million litres a year. In 2013, the first year Cabo Verde was fully operational, this resulted in approximately US\$1.5 million in savings for Electra S.A.R.L.

Does Cape Verde have biomass?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Cape Verde: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

How many wind turbines are there in Cape Verde?

The project constructed 30 wind turbines across four of Cape Verde's islands (Boa Vista, São Vicente, Sal and Santiago) and established Cabo Verde SA as the first Public Private Partnership (PPP) to deliver commercial scale wind power in sub-Saharan Africa.
