

What does statera energy do?

Our assets provide critical grid balancing support for a renewables-led power system, enabling the UK's decarbonisation drive while increasing national energy security. © 2024 Statera Energy. All Rights Reserved.

What is energy in Belarus?

Energy in Belarus describes energy and electricity production, consumption and import in Belarus. Belarus is a net energy importer. According to IEA, the energy import vastly exceeded the energy production in 2015, describing Belarus as one of the world's least energy sufficient countries in the world. Belarus is very dependent on Russia.

How much power does statera have?

Set up in 2015, Statera has 1 GW of flexible generation in operation and under construction, a capacity enough to power around 750,000 homes. The company's project pipeline tops 16 GW, with 7.5 GW of flexibility assets planned to be deployed by 2030. Do you know we have a daily hydrogen newsletter? Subscribe here for free!
