RWE has commenced construction of an ultra-fast battery energy storage system (BESS) at its Moerdijk power plant in the Netherlands.. The system, designed with an installed capacity of 7.5MW and a storage capacity of 11 megawatt hours (MWh), aims to enhance grid stability by providing or absorbing electricity within milliseconds.

UK-based energy company Statera Energy has received \$300m (\$376.82m) of debt financing from a syndicate led by Lloyds Bank to develop a BESS and flexible generation project in Thurrock, UK.. Lloyds Bank was the sole structuring bank in the debt deal, with participation from NatWest, Santander and Siemens Financial Services through Siemens Bank.

Taking on board feedback through a business survey and the Climate Change Transformation Team, the key features and improved changes to the BESS include: Increased financial assistance available for eligible businesses ranging from \$20,000 to \$100,000, tiered as follows: Up to \$50,000 for businesses of all sizes

The A\$1.6bn (\$1.07bn) Collie BESS, WA's largest grid-connected facility, is scheduled to become operational in 2025 and will be able to supply electricity to 785,000 homes for four hours. It will complement Synergy's existing battery systems located in Kwinana.
