

How many plant species are there in Niue?

The Polynesian island of Niue is home to c. 160 naturalised flowering-plant species. Another 50 or more wild-growing species are either pre-European introductions or native plants that are favoured by today's disturbance-regimes.

What is the flora of Niue?

The flora of Niue is very similar to that of the adjacent islands and archipelagos, particularly Samoa and Tonga, but is much smaller. It comprises approximately 159 native flowering plant species (125 dicots and 34 monocots), in addition to 25 ferns and 2 fern allies, for a total of 186 vascular plant species.

Should a botanical garden be set up in Niue?

A botanical garden should be set up in Niue to grow rare native plants and cultigens. This would probably be best situated on the government's Vaipapahi Farm. It would be used to preserve the rare plants of Niue, and could also be used by native healers who are having trouble locating the plants they use in their medicines.

Are Niue plants rare?

Niue Plants Needing Protection Based upon the research and field works for this report, 57 rare flowering plant, fern, and fern-ally species are recognized here as rare on Niue. Four of the native species are recommended for consideration for inclusion on the Red List of Niue plants produced by the IUCN.

Are there weeds in Niue?

The first are known as Polynesian weeds, the latter as Polynesian cultigens. Six species have been selected here as deserving recognition as being threatened in Niue, as well as on other Polynesian islands. Normally, alien plants like this 19
