Car batteries are terrible for back-up power in the home. They are designed to generate high amperage for a few seconds-- that's what you want in order to crank the starter motor. Unlike lithium batteries, car batteries are not designed to be drained down and recharged... which is what you want for any sort of back-up power.

What's the best backup internet for home users? If your ISP offers a backup internet service, it's a good way to stay online during internet outages. If it has a battery or external battery pack, it will also be able to keep

you online during a power outage even if you don't have a generator.
