

What is Bolivia's energy mix?

Bolivia's overall energy mix is dominated by fossil fuels, with natural gas (50%) and petroleum products (31%) supplying most of the country's energy in 2020. In 2021, Bolivia's national electricity agency ENDE announced its intention to generate up to 80% of the country's power from renewable sources by 2025.

What is Novo energy?

Novo Energy was launched between the two Swedish companies in June 2021. The aim of this joint venture was to build the next generation of pure electric Volvo cars. Volvo, which is majority owned by China's Geely, says it plans to become a fully electric car maker by 2030.

Who owns Novo energy?

Volvo Cars has released a statement declaring that it plans to take full ownership of Novo Energy, a joint venture between Volvo and the Swedish battery company Northvolt. Novo Energy was launched between the two Swedish companies in June 2021. The aim of this joint venture was to build the next generation of pure electric Volvo cars.

What type of energy system does Bolivia use?

Similar to the country's total energy system, the power sector relies heavily on natural gas (AETN, 2016). The electricity network in Bolivia is broken into two classifications: the National Interconnected System (SIN) and the Isolated Systems (SAs).

Is there a long-term optimization model for the Bolivian energy sector?

To better answer this question, a long-term optimization model of the Bolivian energy sector was developed with OSeMOSYS, considering the national energy demands, disaggregated by fuel and type of consumer.

What is the energy sector in Bolivia?

The Bolivian energy sector, which is almost completely nationalized, is headed by the MHE (Ministerio de Hidrocarburos del Estado Plurinacional de Bolivia) whose mission, according to their website, is to create policies that promote the integrated development of the energy sector in a manner that is equitable and in harmony with Mother Earth.

This translates to limitations in basic needs such as lighting, cooking and heating. While non-renewable energy could also reduce this energy gap, Bolivia's Ministry of Hydrocarbons and Energy made it a point to include renewable energy sources in its "To Live with Dignity" electricity program, launched in 2008. This program aims for ...

You will be employed at NOVO Energy from the start. For your first 12 months you will be on leave from NOVO Energy and get a temporary employment at Northvolt. After 12 months (or whatever is agreed upon),

the leave ends and when you move back to Gothenburg you start your job as an employee of NOVO Energy.
