

With the changes outlined in the Plan Bolivia aims to become an "energy heart" of South America. Renewable energy is recognised as an important energy source. Bolivia aims to reach 183 MW of renewable power generation by 2025 with ...

As a country whose primary energy demand is 95.8% dependent on fossil fuels, Bolivia's current energy profile is neither environmentally sustainable nor sensible in terms of energy security. Recognising this, the Latin American nation has ...

Bolivia currently generates nearly two thirds of its electricity from fossil fuels. But now it's promoting renewables so they'll account for the vast majority of its energy in just a few years' time.

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be ...
