

# Boost energy systems Trinidad and Tobago

Why is energy security a priority for Trinidad and Tobago?

Energy security is a priority for Trinidad and Tobago. Accordingly, we have set in train steps to optimise the exploitation of our oil and gas resources while mitigating the emission of greenhouse gases and adopting low carbon solutions.

Should Trinidad & Tobago invest in wind and solar energy?

Tapping into Trinidad & Tobago's vast wind and solar resources for domestic electricity consumption would allow it to export more natural gas and use the extra revenue to finance its broader, long-term energy transition plans. Why do financial institutions have a role to play in energy transition?

What is the energy policy of Trinidad and Tobago?

The Government of Trinidad and Tobago is currently developing a national energy policy green paper that recognises renewable energy's (RE) combined with energy efficiency (EE) and utilisation of compressed natural gas in the transportation sector, inter-alia, as important strategies for the promotion of sustainable development of the nation.

Can a multisource financing facility transform Trinidad & Tobago's energy sector?

The company is publicly listed on the Trinidad & Tobago Stock Exchange. The bank and the Minister of Energy and Energy Industries discussed a multisource financing facility that could have a transformative impact on the region's energy sector. The facility would combine various sources of financing, including from the private sector.

Will natural gas production improve in Trinidad & Tobago by 2028?

The conference concludes tomorrow. --Photo: ISHMAEL SALANDY Prime Minister Dr Keith Rowley says natural gas production in Trinidad and Tobago will be tight for the period 2024 to 2027 but will improve by 2028.

How will oil prices affect Trinidad & Tobago's economy in 2022?

Nevertheless, the rise in oil prices in early 2022 provides a more positive economic outlook, with higher-than-expected revenue and foreign exchange reserves for the year. Trinidad & Tobago relies heavily on natural gas for electricity generation, and has missed its target of meeting 10% of energy needs with renewable sources by 2021.
