Bouvet Island History. Discovery and Naming: The French explorer Jean-Baptiste Charles Bouvet de Lozier discovered Bouvet Island in 1739 honor of his contribution to the region"s exploration, it was given his name. The island wasn"t given back until many years later due to how difficult it was.

The Problem It is a well known fact that about 1.3 billion people are forced to live their lives in energy poverty across the globe. That is 17% of the global population living in the dark. This means that these people lack access to basic energy services. Access to energy, means access to education, communication, ...

No wonder sailors call Bouvet the world"s most remote island; no wonder writers and science fiction movie-makers keep using it in their storylines. Other stories from the AGU meeting you might like:

FOOTHILL RANCH, CALIFORNIA--In a suburban industrial park south of Los Angeles, researchers have taken a significant step toward mastering nuclear fusion--a process that could provide abundant, cheap, and clean energy.A privately funded company called Tri Alpha Energy has built a machine that forms a ball of superheated gas--at about 10 million ...
