

Will Brazil build 224mwh of battery energy storage capacity by 2025?

Matrix Energiah has completed Brazil's first green debentures issuance worth \$18m to build 224MWh of battery energy storage capacity by 2025.

Will Brazilian batteries compete in energy auctions in 2024?

Our Standards: The Thomson Reuters Trust Principles. The Brazilian government plans to include batteries and other forms of energy storage to compete in energy auctions which are set to happen in the first half of 2024, an official from the Mines and Energy Ministry told Reuters.

Should Brazil use batteries to power its electricity grid?

Operating Brazil's electricity grid has become more complex, requiring more flexibility, as energy sources with a variable output - such as wind and solar - have gained space in the country's matrix. The batteries would help counterbalance the variability of renewable generation stepping in when output from renewable sources is lower.

Will Brazil's first large-scale battery be connected to the grid?
