

We have under development wind and solar projects in Bulgaria. Our small team has 10+ years of experience in the energy sector with more than 1 GW of RES developed in the EU. Since 2018 the company's innovation and R& D activities have been focused on the development of smart grid by leveraging on IoT, blockchain, crowdfunding, cyber security ...

With a nominal output of 124 megawatts peak (MWp), the Verila solar power plant will make a significant contribution to Bulgaria's green electricity mix from spring 2023 onwards. Built by SUNOTEC, the new solar ...

Solsbor Pazardzhik Solar PV Park is a 10MW solar PV power project. It is located in Pazardzhik, Bulgaria. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently active.

In 2023, Romania also witnessed a record-breaking year for solar, adding over 1 GW of new capacity through distributed generation and utility-scale projects. This marked a 308% increase compared to the capacity deployed in 2022, establishing solar PV as the fastest-growing power source in the country the end of 2023, the cumulative PV capacity, encompassing ...

The project is being developed and currently owned by Yambol. The company has a stake of 100%. Yambol Vodenichane Solar PV Park is a ground-mounted solar project. The solar power project consists of 38,400 modules. Development status The project construction is expected to commence from 2025.

The scheme for St. George includes the installation of almost 400,000 photovoltaic (PV) modules on a decommissioned airfield covering 165 hectares. Rezolv secured a licence for this project in January and plans to finance it through loan facilities from a consortium of international lending partners and regional commercial lenders.

Several large scale solar photovoltaic (PV) projects with a capacity above 50 MW have been announced in Bulgaria after 2019 and these projects will be built between 2023 and 2025, ... Development of operational solar PV power plants in Bulgaria started with very moderate steps in 2007 but progressed at fast paces after the second half of 2010 ...

The Renalfa IPP project in Razlog has been claimed as the biggest project of its type in Bulgaria. It is also larger than the biggest project to come online so far in neighbouring Romania, a 6MW/24MWh BESS in that country's Constanta County, co-located with solar PV and wind generation plants. That project, by developer Monsson Group and ...

Bulgarian developer Sunotec says it expects to complete the 124 MW Verila solar project by the end of 2023. It says it will build the array at an altitude between 700 meters and 1,000 meters above ...

The project, which is currently the largest single solar photovoltaic project in Bulgaria, is expected to have a total investment of nearly 300 million euros and is planned to be completed and connected to the grid for power generation in mid ...

824,000 Huasun PV Panels Installed for World's Largest Single-site Heterojunction Solar Project in Bulgaria 2024.07.04 It has been recently reported that the Apriltsi solar power project, located in the southern town of Pazardzhik, Bulgaria, has completed the installation of over 824,000 photovoltaic modules, totaling a capacity of 400 MW ...

"Bulgaria Solar Photovoltaic (PV) Analysis: Market Outlook to 2030, Update 2021" is the latest report from GlobalData, the industry analysis specialists that offer comprehensive information and understanding of the solar PV market in Bulgaria. ... Key Under-construction Projects, 2020. 3.5 Solar PV Market, Bulgaria, Deal Analysis, 2020 ...

Several large scale solar photovoltaic (PV) projects with a capacity above 50 MW have been announced in Bulgaria after 2018 and these projects will be built between 2022 and 2024. The report provides a complete picture of the market situation, ...

Prague-based Rezolv Energy bought a 229 MW solar power project in Bulgaria, set to become the biggest in the country. The facility is scheduled to come online in 2025. Renewable energy developer Rezolv ...

to invest in solar PV projects directly, projects owned by groups of citizens or by energy communities remain rare in the country. There is a lack of a clear and bankable policy framework for renewable energy projects in Bulgaria, and a current gap with regard to the transposition of the EU Renewable Energy Directive - II (RED-II).

This surge is attributed to a flurry of major solar facilities being commissioned, with more projects in the pipeline. Over the past two years, Bulgaria has doubled its combined nameplate size of solar power installations, exceeding 2.4 GW. This summer saw a peak in new additions, reshaping the country's solar energy landscape.
