

What is energy storage Forum?

We are Europe's first conference dedicated solely to energy storage since 2010. All of our Forum's culminate with the unique Building the Action Plan feature. Join us for this session and take back an action list to the workplace.

Why is energy storage important?

I also consent to having my name published. Energy storage is key to secure constant renewable energy supply to power systems- even when the sun does not shine, and the wind does not blow. Energy storage provides a solution to achieve flexibility, enhance grid reliability and power quality, and accommodate the scale-up of renewable energy.

Which energy storage stocks are a good investment?

Albemar is the top holding, followed by Tesla, so if you can't decide from the previous stocks, this fund is a good one-stop investment to play the pending energy storage boom. With more than \$1 billion under management and about 60 components, this First Trust fund is another interesting and diversified way to play energy storage.

Should energy storage be regulated?

The European Association for Storage of Energy (EASE) have also stated that regulations must keep up with advances for the technology to flourish. The benefits of energy storage for both end users and the grid have already reached a tipping point where costs are justified for many business cases - this trend shows no sign of stopping.

How can energy storage improve reliability?

These are characterized by poor security of supply, driven by a combination of insufficient, unreliable and inflexible generation capacity, underdeveloped or non-existent grid infrastructure, a lack of adequate monitoring and control equipment, and a lack of maintenance. In this context, energy storage can help enhance reliability.

Do energy storage systems need an enabling environment?

In addition to new storage technologies, energy storage systems need an enabling environment that facilitates their financing and implementation, which requires broad support from many stakeholders.
