

Chevrolet new sail clutch energy storage device

How much kph does a Chevy sail get?

With two burly people and a few bags of luggage onboard, the car struggled to get past 140 kph on the Amby Valley Airstrip. Chevrolet quotes ARAI ratings of 22.1 kpl for the diesel Sail. The diesel is mated to a competent 5-speed gearbox. You'll enjoy using the extremely close-gated gearbox and its short-throw shifter.

Is the Chevrolet Sail a good car?

The Chevrolet Sail has much better low-end driveability, due to the lesser turbo lag. The 205 Nm of peak torque (@1,750 rpm) comes in a full 300 rpm earlier than in the MJD & DDiS cars, making it more adept for the urban crawl. The Sail's behaviour within the city is extremely balanced.

Is the sail petrol a good hatchback?

As you work your way through the ratios, power builds up nicely and the Sail petrol feels acceptably quick for a hatchback of this size. The engine remains refined and silent. At high rpm, the motor does get audible, but it's not too obtrusive. The Sail petrol gets a short-throw 5 speed gearbox as well.

Is GM sail a good car?

Best driven sedately The Sail has no USP inside or out. It doesn't stand out from the crowd. There is no one thing that people will feel the need to talk about. This doesn't speak badly of the car, it's just a balanced all-rounder. However, word of mouth is the best marketing tool available in India today, and GM shouldn't miss out on this!

How much does a Chevrolet Sail U-Va cost in India?

The Chevrolet Sail U-VA has been launched in India at a price of Rs. 4.44 - 6.62 lakhs (ex-Delhi).
o Superbly tuned 1.3L diesel powerplant. Short-throw gearbox is a pleasure to use
o Spacious interiors. Rear legroom betters some sedans
o Sensitive steering at high speed. Needs a steady hand on the expressway

Will there be a sedan version of the sail?

o A sedan version of the Sail could hit the market as soon as December 2012 / January 2013.
o The distance from the front seat's base to the floor is roughly 1 foot, giving it that perched feel. Result = Good view of the road ahead. The reason for this raised seat height could be the fuel tank, which is placed under the front seats.
