

Replaced my unit a couple of years ago with a more efficient one that cut my electric bill in summer about 150/mo to 200/mo in these bad months. I am at 50 to 55kWh/day. APS Bill is ...

This is with an electric car we charge during super offpeak times, an inefficient single speed pool pump, but also a brand new HVAC system that I think is like seer14 equivalent (the minimum ...
