How much power does Türkiye generate?

Türkiye generated 118 TWh of power from coal, ahead of Poland's 97 TWh and almost reaching Germany's 121 TWh. In 2013, 25% of power was from coal in both Türkiye and the EU. In 2023, this was down to a record low 12% in the EU, but reached a record high 36% in Türkiye. The rise in coal-fired electricity generation was driven by imported coal.

How much electricity is generated by natural gas in Türkiye?

Thus, the share of electricity generation from natural gas in total generation fell to 16% in December - the lowest level in December for five years. Although Türkiye has added 11 GW of wind and solar capacity in the last five years, other European countries have proved this is possible in a single year.
