Does the Central African copperbelt contain cobalt?

The Central African Copperbelt is the only sedimentary rock-hosted stratiform copper district that contains significant cobalt. Its presence may indicate significant mafic-ultramafic rocks in the local basement. The balance of primary cobalt production is from magmatic nickel-copper and nickel laterite deposits.

Is safety a priority for Copperbelt Energy Corporation plc?

Safety remains a priority for Copperbelt Energy Corporation Plc after they performed 2.98 million man-hours without a power system lost time accident in 2012, which demonstrates an improved performance for this critical area of concern. "We are dedicated to the pursuit of an excellent SHE culture across the business," the website states.

What are Central African Copper Belt deposits?

Central African Copper Belt deposits are sometimes referred to as shale-hosted copper deposits, this is a poor description because the deposits are often not in shales, as much of this style of mineralization is hosted in sandstones. This type of deposit is host to around 25% of the world's copper resources.

Why should you volunteer at Copperbelt Energy Corporation plc?

Copperbelt Energy Corporation Plc encourages its employees to volunteer, as they continue to invest in local communities, conducting their business as a good corporate citizen in a way that helps protect the environment and demonstrates good stewardship of the country's natural resources.
