

How much does solar cost in Croatia?

The maximum reference values of market premiums for solar were EUR0.82/kWh and EUR0.75/kWh for wind. The first auction for large-scale projects in Croatia took place in 2022 to procure 638 MW of new capacity. However, it only attracted tepid interest, with premiums awarded to just 107 MW of projects.

How many MW of solar projects did Croatia tender?

The Croatian authorities initially reviewed 144 projects totaling 713 MW for the auction. The tender was carried out in two phases. One awarded market premiums for projects with installed capacities of more than 1 MW each, including 350 MW of solar, 60 MW of wind, and 7.25 MW of hydropower.

When was the first solar auction in Croatia?

The first auction for large-scale projects in Croatia took place in 2022 to procure 638 MW of new capacity. However, it only attracted tepid interest, with premiums awarded to just 107 MW of projects. The regulator offered a 300 MW quota for solar plants, but only four bids were accepted, for a total capacity of 8 MW.

Are imported coal and oil filling the energy gap in Croatia?

Imported coal, oil and gas are filling the gap. "In Croatia, we have exhausted all of our hydropower resources," said Andro Bacan, a renewable energy expert at the state-owned Energy Institute Hrvoje Pozar, back in the busy capital Zagreb.

Is solar energy a game-changer in Kenya?

Solar energy in Kenya is being hailed by experts as a game-changer. Generating power from the East African nation's sunshine can potentially revolutionize its energy sector in terms of cost-effectiveness and scalability. Why is there so little solar energy in one of Europe's sunniest countries?
