

Who is elcora?

Elcora Ltd has been manufacturing and installing high quality solar thermal systems in Cyprus for over 35 years. As long ago as 1959, when solar hot water was in its commercial infancy, founder Costas Nicolaou was installing equipment - and in those days systems were very basic and cumbersome.

Who are elcora solar thermal collectors?

Elcora is one of the most innovative and successful manufacturers and suppliers of both passive and active solar thermal systems. Elcora designs and manufactures solar thermal collectors. The very latest heat-absorbing materials are used and every component is thoroughly tested.

Who makes elcora hot water cylinders?

Elcora designs and manufactures solar thermal collectors. The very latest heat-absorbing materials are used and every component is thoroughly tested. The company has been making hot water cylinders for 35 years, and today uses the latest precision automatic welding machinery in its production processes.

Why should you choose elcora?

With years of experience, Elcora knows about solar energy. Experts are available to home-owners, developers, architects and engineers for consultations on any aspect of the product range and how to get the best performance. Although a range of ready-designed products is available, nearly every requirement is different.

Do elcora systems need maintenance?

Elcora systems are efficient and long-lasting and require the minimum of maintenance. However, routine servicing is wise. On request, an engineer will give the system a complete overhaul and test every aspect to ensure the highest level of performance year after year.
