

How does Berkeley Energy Invest?

Investments are supported by local renewable legislation and commercial market drivers. Berkeley Energy mainly develops projects and manages them through construction and into operations and also acquires brownfield projects opportunistically.

What does Berkeley Energy do?

Berkeley Energy works with its partner companies to provide engineering, management, and financial support, whilst offering the ability to act as a bankable sponsor for renewable power projects. Our approach is hands-on, asset-first, technically orientated. We look to achieve our returns by holding equity in well-conceived and constructed projects.

How many funds does Berkeley Energy manage?

Berkeley Energy currently manages four closed end funds (two in Asia and two in Africa) and one permanent capital vehicle (global); The funds are mainly focused on grid-connected, utility scale projects using traditional, proven renewable energy technologies such as hydro, wind, solar and battery energy storage systems (BESS).

What makes Berkeley Energy unique?

Berkeley Energy's technical and operational capabilities are complemented with dedicated financing, legal, and structuring professionals with experience in private equity, infrastructure, and renewable energy transactions.

Where is Berkeley Energy regulated?

Berkeley Energy has offices in London, Singapore, Nairobi, Mauritius, Delhi, and Manila. Members of the group are authorised and regulated by the United Kingdom Financial Conduct Authority and in Mauritius by the Financial Services Commission.
