

What are Cyprus' energy goals?

For the heating and cooling sector, Cyprus foresees a target of 39.4%. In the transport sector, Cyprus plans to achieve 14% share of renewable energy by 2030. Cyprus supports PV and biogas/biomass for electricity production, while it also leans on onshore wind to achieve RES targets.

How does Cyprus generate electricity?

Cyprus supports PV and biogas/biomass for electricity production, while it also leans on onshore wind to achieve RES targets. Most RES electricity is connected through net-metering where it assumes energy is used for own consumption and surplus injected to the grid. Cyprus is currently not interconnected.

What is Cyprus' energy policy?

Cyprus' energy policy has created financial support for RES projects, and a special fund was created aiming to support RES and energy saving investments in Cyprus, with revenue derived from consumers paying a 'green tax' levied on electricity bills (currently at EUR0.005 per kWh and EUR0.0025 per kWh for vulnerable groups).

How does Cyprus support the energy sector?

For the heating and cooling sector, Cyprus supports solar thermal and use of heat. Finally the transport targets are planned to be met through electrification of transport and use of biofuels.

Is Cyprus ready for full electricity market liberalisation?

Currently, Cyprus is in a transitional step before full electricity market liberalisation, which is being driven by the binding timetable of the Cyprus Energy Regulatory Authority (CERA) to ensure the full opening up of the energy market and granting consumers the right to choose their own supplier.

How can Cyprus overcome a high dependency on fossil fuels?

A key hurdle for Cyprus to overcome is its high dependency on fossil fuels for energy - with one of the biggest shares within the EU. This makes it crucial for the country to develop both its renewable energy sources and natural gas, the cleanest of the fossil fuels, as a transitional fuel.

Island Energy Services operates a large-scale fuel import terminal in Kapolei, Hawai'i, located on the island of O'ahu. With two 23-mile pipelines, Island Energy Services transports motor gasoline, jet fuel, diesel, and naphtha from Kapolei to its Marine Terminal at Pier 30. We also transport jet fuel that supplies the Daniel K. Inouye ...
