

How will the Isle of Man generate electricity?

Plans to generate about 75% of the Isle of Man's electricity through solar and on-shore wind projects have been backed by the Council of Ministers. Manx Utilities (MU) will look to install solar panels on public car parks and government buildings. Wind turbines could also be built on public land to create 30MW of electricity by 2026.

How much electricity does the Isle of Man need?

While average electricity demand on the Isle of Man stands at 40MW, it can peak at 75MW during the winter and drop at night during summer to 25MW. MU chairman Tim Johnston said "detailed work" to determine the best approach to increase renewable energy was underway.

Will the Isle of Man reduce emissions by 2050?

**SUMMARY OF KEY FINDINGS** In response to the global climate emergency, the Isle of Man Government has legislated to reduce its emissions to net zero by 2050. This target has implications for both electricity demand and generation mix.

How will a wind farm impact the Isle of Man?

**Environmental:** The development of a 700-800 MW capacity wind farm in Manx territorial waters will provide the IoM with renewable, zero carbon electricity. Such a development will play a key role in decarbonising the Isle of Man economy to meet net zero targets.

How has electricity demand changed on the Isle of Man?

The annual electricity demand on the Isle of Man has gradually declined since 2012. Between 2012 and 2019, annual demand decreased by 17 GWh, or approximately 5%. The drop in annual electricity demand has been driven by decreases in residential and commercial demand; however, industrial demand has increased.

Can the Isle of Man provide stabilising power to GB or ROI?

Opportunities for the Isle of Man to provide stabilising power to GB or ROI from a large-scale baseload power station, e.g. biomass or a small modular reactor? Neither option is without challenge, but likely provide the greatest potential for export. These options have not been explored in the analysis.

The Isle of Man Ship Registry (IOMSR) has registered four new energy-efficient Newcastlemax bulk carriers from Singapore-based dry bulk owner Berge Bulk. Courtesy of Isle of Man Ship Registry (IOMSR) Under the IOMSR green registration fees regime, Berge Bulk will receive a 10% reduction on the annual registration fee for the vessels.
