

What are the issues affecting the energy sector in the Dominican Republic?

The issues of grid capacity and storage, in particular, are curbing expansion at normative and technological level. The Dominican Government continues to expand renewable energy, electromobility and energy storage technologies and is reducing emissions of greenhouse gases.

What is Energas & AES doing in the Dominican Republic?

Energas and AES shared a commitment to transitioning the Dominican Republic away from conventional generation and toward a greener energy mix through natural gas.

Is the electric power sector affecting the Dominican economy?

Despite the present administration's efforts to increase the installed capacity of electricity generation from renewable sources, the electric power sector continues to be one of the most significant problems affecting the Dominican economy.

Does the Dominican Republic need a natural gas infrastructure solution?

However, the Eastern region of the country where Energas' facility is located lacked existing natural gas networks or pipelines to transport natural gas. The Dominican Republic needed a holistic infrastructure solution to strategically shift from conventional generation to natural gas.

Why is the Dominican Republic growing so fast?

The Dominican Republic is one of the fastest growing economies in Latin America. This is also apparent in the expansion of renewable energy. Its share of power generation has more than tripled since 2017.

Does Energas use natural gas in Dominicana?

Through AES Dominicana, we introduced natural gas into the country over 20 years ago, saving our customers over half a billion dollars and avoiding four million tons of CO₂ emissions every year. However, the Eastern region of the country where Energas' facility is located lacked existing natural gas networks or pipelines to transport natural gas.

The project helps Dominican Republic to reach its goal until 2025, the year in which they expect 25% of the electricity consumed by the country to come from renewable energies, and has ...

The project helps Dominican Republic to reach its goal until 2025, the year in which they expect 25% of the electricity consumed by the country to come from renewable energies, and has generated more than 500 direct jobs in the region.

<p>Santo Domingo.- During the "Energy Sector Reform" Forum organized by the Dominican Association of the Electric Industry (ADIE) and the Technological Institute of Santo Domingo (INTEC),

Edward Veras, ...
