

Will Iraq introduce solar energy?

ERBIL, Kurdistan Region - Iraq's Prime Minister Mohammed Shia' al-Sudani on Thursday approved plans to introduce solar energy systems into Iraqi households, in a bid to ease the load on the national electricity grid and combat electricity shortages.

How much solar power does Iraq have in 2023?

According to the latest statistics by the International Renewable Energy Agency, it had just 1,599 megawatts of renewable energy capacity at the end of 2023. Iraq has abundant untapped solar resources that could allow it to achieve its target and reduce reliance on imports of electricity.

Will TotalEnergies build a solar power plant in Iraq?

French energy major TotalEnergies will build a 1-gigawatt solar power plant in Iraq as part of a cluster of contracts it was awarded in 2021 for an integrated project that entails a total investment of \$27 billion over 30 years.

Will Iraq reach 10GW of solar by 2030?

Iraq is aiming to reach 10GW of installed solar by 2030. Image: IRENA. French energy company TotalEnergies has revived its deal with the Iraqi Government to develop a 1GW solar PV project in the Basra region, part of a larger US\$10 billion accord to also establish new gas generation and seawater treatment facilities.

How much electricity will Iraq generate a year?

“Once completed, it is projected to generate 2.9 billion kilowatt-hours of electricity annually and reduce carbon dioxide emissions by 2.385 million tons. “The project will meet Iraq's growing electricity demands, facilitate the optimization of its power structure, and accelerate its economic reconstruction.

Will Iraq build a power plant?

In late June, Iraq's national investment commission signed an investment licence with French energy conglomerate, TotalEnergies, to develop a power plant with a capacity of 1,000 megawatts for the south of the country. The plant reportedly would supply clean energy for approximately 350,000 houses.
