While distributed solar power generation is efficient during daylight hours, its lack of storage capabilities can be a drawback. The cost of batteries often outweighs the benefits of solar panels, making the overall economic case for alternative power generation less compelling. Kyrgyzstan, however, is uniquely positioned to overcome this obstacle.

Kyrgyzstan's geographic location and climatic conditions are quite favourable for the broader development of solar energy, evident in solar radiation maps. Annual specific power generation by photoelectrical equipment has a potential 300 ...
