

The Commonwealth of the Northern Mariana Islands (CNMI), the newest U.S. territory, consists of a chain of 14 islands in the western Pacific Ocean almost 3,900 miles west of Hawaii and about 1,600 miles east of the Philippines. 1,2,3,4 The Mariana island chain rises from the ocean floor at the western boundary of the Mariana Trench, which contains the deepest ...

Figure 1. Regional map of the Mariana Islands and the adjacent Mariana Trench (Trusdell et al., 2006). The Commonwealth of the Northern Mariana Islands consists of two concentric lines of islands and extends from Rota at about 14 degrees N latitude to Uracas at about 20 degrees N latitude. Pagan Island is located along the inner arc and

Pagan Island is the subaerial portion of two adjoining Quaternary stratovolcanoes near the middle of the active Mariana Arc, [FAT1]north of Saipan. Pagan and the other volcanic islands that constitute part of the Arc form the northern half of the East Mariana Ridge[FAT2], which extends about 2-4 km above the ocean floor.

The Commonwealth of the Northern Mariana Islands (CNMI) is a territory of the United States in Micronesia, visited mainly by tourists from East Asia. The Marianas' top activity among Americans is scuba diving and snorkeling. In addition to the coral reefs you might expect, the waters around the islands were the scene of fierce fighting during World War II and there are many ship ...
