What is a battery energy storage system?

BESS are the power plants in which batteries, individually or more often when aggregated, are used to store the electricity produced by the generating plants and make it available at times of need. The fundamental components of a Battery Energy Storage System are the blocks formed by the batteries, but other elements are also present.

Who uses battery energy storage systems?

The most natural users of Battery Energy Storage Systems are electricity companies with wind and solar power plants. In this case, the BESS are typically large: they are either built near major nodes in the transmission grid, or else they are installed directly at power generation plants.
