

EMEA is expected to reach 114GW/285GWh cumulatively by the end of 2030, a tenfold growth in gigawatt terms, with the UK, Germany, Italy, Greece, and Turkey leading additions. The Americas region represents 21% ...

The significant utility-scale storage additions expected from 2025 onwards align with the very ambitious renewable targets outlined in the REPowerEU plan and a renewed focus on energy security in the UK. BNEF ...

The US Energy Storage Monitor explores the breadth of the US energy storage market across the grid-scale, residential and non-residential segments. This quarter's release includes an overview of new deployment ...

Latest publication available now. The U.S. energy storage monitor is a quarterly publication of Wood Mackenzie Power & Renewables and the American Clean Power Association. Each quarter, we gather data on U.S. energy storage ...

10 ???&#0183; As the global energy landscape evolves, financial investors and corporates are navigating the complexities of the energy transition. This transformation offers significant ...

A 2022 report titled Energy Storage: A Key Pathway to Net Zero in Canada, commissioned by Energy Storage Canada, identified the need for a minimum of 8 to 12GW of installed storage ...

In July 2021 China announced plans to install over 30 GW of energy storage by 2025 (excluding pumped-storage hydropower), a more than three-fold increase on its installed capacity as of 2022. The United States' Inflation Reduction Act, ...

1 ??&#0183; In 2025, some 80 gigawatts (gw) of new grid-scale energy storage will be added globally, an eight-fold increase from 2021. Grid-scale energy storage is on the rise thanks to four potent forces.

U.S. battery storage capacity has been growing since 2021 and could increase by 89% by the end of 2024 if developers bring all of the energy storage systems they have planned on line by their intended commercial ...

Global energy storage's record additions in 2023 will be followed by a 27% compound annual growth rate to 2030, with annual additions reaching 110GW/372GWh, or 2.6 times expected 2023 gigawatt installations. ...

Record-breaking investment in utility-scale storage and booming results for rooftop solar are among the new data published in today's Clean Energy Australia 2024 report. The report found that renewables overall ...
