

Energy storage investment and financing events

What is Energy Storage Conferences?

Energy Storage Conferences is an indexed listing of upcoming meetings, seminars, congresses, workshops, programs, continuing CME courses, trainings, summits, and weekly, annual or monthly symposiums related to energy storage.

Is CIF funding the next frontier in energy storage?

CIF is also fueling the next frontier in energy storage: \$70m in CIF funding is set to help kick-start a \$9 billion energy revolution in Brazil, which includes substantial investments in energy storage, such as pumped hydro and green hydrogen development.

Why is energy storage important?

Storage is indispensable to the green energy revolution. The most abundant sources of renewable energy today are only intermittently available and need a steady, stored supply to smooth out these fluctuations. Energy storage technologies are also the key to lowering energy costs and integrating more renewable power into our grids, fast.

Should storage projects be funded?

One large missing piece has been funding. Storage projects are risky investments: high costs, uncertain returns, and a limited track record. Only smart, large-scale, low-cost financing can lower those risks and clear the way for a clean future.

Will South Africa get 100 mw of energy storage?

Over 4,000 miles away and with a population one hundred times larger, another country is making great strides in energy storage. Thanks to \$250 million in concessional finance from CIF, South Africa is soon to see 100 MW of new storage capacity come online.

How many new storage projects have been approved in the developing world?

Twelve new projects across the developing world have already been approved, including in Bangladesh, Brazil, Colombia, Haiti, Honduras, India, Indonesia, the Maldives, and Ukraine. In the next three years, CIF plans to create 1.8 GW of new storage capacity and integrate an additional 16 GW.
