

What is energy storage training?

By taking the Energy Storage training by Enoinstitute, you will learn about the concept of energy, how to store energy, types of energy-storing devices, the history of energy storage systems, the development of energy storage by 2050, and long-term/short-term storage.

What are energy storage courses?

Courses cover the energy storage landscape (trends, types and applications), essential elements (components, sizing), technical and project risks, and the energy storage market. Additionally, we can provide combined courses covering wind, solar and/or grid-connection as well.

What can I learn from the energy storage training by Tonex?

By taking the Energy Storage training by Tonex you will learn about the concept of energy, how to store the energy, types of energy storing devices, history of energy storage systems, development of energy storage by 2050, and long term/short term storage.

What is the solar and energy storage training course?

This three daytraining course on solar and energy storage will provide insight into the latest energy transition outlook for both solar and storage technologies. For more information please refer to the leaflet . This course is available on request. Content,location and duration of the course can be adapted to your specific wishes.

Who should take the energy storage course?

This course is intended for project developers,insurers and lendersinterested in,or working with,energy storage.
