

What is EP Cube?

Introduction . The EP Cube is a flexible and intelligent all-in-one home energy storage solution for new and existing solar installations.

What is EP Cube hybrid inverter?

The EP Cube hybrid inverter allows up to 16A per PV string current, and supports up to 4 MPPT connections, enabling greater PV panel connectivity so as to transform more solar energy into electricity for energy storage. EP Cube helps you store electricity from the grid when the price is lower, reducing costs and realizing automatic storage.

How does the EP Cube storage system work?

The EP Cube storage system aesthetically and compactly integrates a hybrid inverter, UPS functionality and lightweight, stackable battery modules via plug & play connectors. Each module has a capacity of up to 3.3 kWh and weighs less than 35 kg, making it easy to transport, handle and install.

What is the capacity of the EP Cube?

Each module has a capacity of up to 3.3 kWh and weighs less than 35 kg, making it easy to transport, handle and install. The minimum capacity of the EP Cube is 6.6 kWh with the possibility to stack modules up to a capacity of 19.9 kWh, offering a wide range of possibilities for every household.

Who is presenting EP Cube at genera in Madrid?

Canadian Solar and Eternalplanetto Present EP Cube at Genera in Madrid from February 6 to 8, Together with Its Trusted Regional Partners Eternalplanet, a consumer-oriented independent brand under Canadian Solar, attends Genera in Madrid with its first self-design-and-developed residential energy storage system, the EP Cube.

How many MPPTs does the EP Cube have?

With 2 MPPTs and an input current of 16A, the EP Cube is compatible with high power modules, microinverters, optimizers and EV chargers*. Furthermore, it can be integrated into both a new and an existing PV installation. *Currently under development.
