

Are solar panels a good investment in Estonia?

Solar panels are a great possibility for investment, which ensures a steady future for decades. Is there really enough sun in Estonia? Solar energy is the only renewable, free of charge and inexhaustible form of energy. Every day more sunshine reaches the earth that we take advantage of.

Can solar panels be installed on a flat roof in Estonia?

In Estonia, most solar panel installations are installed on pitched roofs. Ideally, the panels should be installed at a 41 degree angle on the south side of the building. If they are installed to the north, the panels will not generate electricity. Alternatively, flat roofs may also be installed with solar panels.

How many solar panels are installed at Estonia dairy farm?

We built a solar power plant on the roof of Estonia Dairy Farm in Järva County, where we installed 644 solar panels. Over the years, we have vigorously expanded our solar energy production. The parks are located in 38 locations. More than 100 000 solar panels in total are located in our solar parks. The parks are located in 38 locations.

What to do with solar energy in Estonia?

We have prepared an exciting tour - go on a ride on the wind turbine nacelle or take a walk at the solar park, the annual electricity output of which is equivalent to the average annual consumption of 300 Estonian homes. We produce renewable solar energy in Estonia and Poland. We own 38 solar parks with a total capacity of 30 MW.

Why do solar parks generate the most electricity in Estonia?

In Estonia, solar parks usually generate the most electricity in May, as the days are quite long and the temperature is lower than in June-July. Lower temperatures help increase efficiency. It is also possible to generate energy in cloudy weather, because solar radiation reaches the solar panels through the clouds as well.

Who is the company Mysolar?

The main activity of the company is the sale and installation of solar panels. Company MySolar has been offering solar systems and project work for homeowners all over Estonia since 2015. The company is the sole representative of Italian and German panel brands in Estonia.

Solar was an absolute no-brainer for me since the solar loan payment is less than my monthly electric bill and my panels will cover 100% of my energy usage. I get to go renewable for free, basically. If you can break even over the production warranty time, you should do it.

Solar panels can be mounted on both flat and gabled roofs. The roof should have enough space that is free of shadows and technical systems: ~400 m² for a gable roof ~1000 m² for a flat roof; The panels can also be

mounted on a free area of land of ~1000 m².
