THE SECOND GENERATION UPS LITHIUM BATTERY SYSTEM. Greatly reduce the floor area and weight Specially designed for UPS, direct replacement of lead-acid battery Built in three-level BMS management system to improve system management All adopt lithium iron phosphate battery, which has longer service life, higher safety and simpler maintenance

AVIC Lithium Technology Co., Ltd. specializes in the R& D and production of lithium battery core materials, lithium iron phosphate energy storage batteries and systems. It is a tens of billions key project introduced by Xiamen, a key project in Fujian Province and a national high-tech enterprise.

At present, the lithium battery industry is in a high-speed growth period. Driven by the development of new energy vehicles and photovoltaic energy storage market, the power energy storage lithium battery market will lead the lithium battery industry to a new height, gradually break the technical monopoly of Japan, South Korea, Europe and the United States on high-end ...

It will become one of the largest lithium-ion battery production bases in China. According to Wang Chongling, president of China Aviation Lithium Battery (Jiangsu) Co., Ltd., the green power projects, especially lithium-ion batteries, are crucial to energy-saving and environmental protection, as well as eliminating smog in China.

Creating high-safety, long-life, high-endurance, and high-energy-density product performance is the common direction of head power lithium battery companies. At the CIBF battery exhibition in 2021, the high-energy-density ternary battery system developed by AVIC Lithium Battery will not be fire-proof technology and products for the first time.
