What is batteries Europe?

Batteries Europe, launched in 2019, is the technology and innovation platform of the European Battery Alliance, run jointly by the Commission and stakeholders in the battery industry.

What are the benefits of battery energy storage in Europe?

Increasing the use of renewables in the energy mix allows energy imports to be reduced, with clear benefits for Europe's energy independence and security. The decarbonisation of the energy mix and reductions in overall CO2 emissions are other clear, positive outcomes of an increased use of Battery Energy Storage in Europe.

Why is energy storage important in the EU?

It can also facilitate the electrification of different economic sectors, notably buildings and transport. The main energy storage method in the EU is by far 'pumped hydro' storage, but battery storage projects are rising. A variety of new technologies to store energy are also rapidly developing and becoming increasingly market-competitive.

Should battery energy storage be regulated in the EU?

The EU's legislative and regulatory framework should guarantee a fair and technology-neutral competition between battery technologies. Several mature technologies are available today for Battery Energy Storage, but all technologies have considerable development potential.

Can battery energy storage solve Europe's energy challenges?

In order to deploy renewables and to release their potential for ensuring a stable and secure energy supply, Europe needs to work to overcome the intrinsic limits of renewables. One solution to these challenges is Battery Energy Storage.

What is battery energy storage?

Battery Energy Storage can support customer loads and provide backup power throughout an entire power outage period, working as an uninterruptable power supply unit (UPS). This service is particularly useful in areas with weak, low-voltage grids.

Noveria Energy develops, builds and operates large-scale battery storage projects across Europe. We support the integration of renewable energies, and with our projects, are making active ...
