

# Export tax rebate for energy storage products

What is the export tax rebate policy?

The export tax rebate policy was initiated in 1985 by eliminating the double taxation on exports. There is 0% value-added tax (VAT) on the exports. You can also enjoy import tax exemption for consumer products import from China. China has attracted more foreign importers, whether agricultural products or electrical products.

Will China reduce export tax rebates?

BEIJING, Nov 15 (Reuters) - China's finance ministry said on Friday it would reduce or cancel export tax rebates for a wide range of commodities and other products, effective Dec. 1. The country will reduce the export tax rebate rate for some refined oil products, photovoltaics, batteries, and certain non-metallic mineral products from 13% to 9%.

What is the energy storage rebate program?

The program was started in 2018, as a response to the need for energy storage systems in fire-prone areas where utility companies frequently shut off power. The program currently offers rebates of between \$150 and \$1,000 per kilowatt-hour of storage.

What is the rebate factor for exported Property & Services?

The rebate factor for exported property and services is 100% of the GST and the federal part of the HST paid on the acquisition of property or services that are exported from Canada by the charity or public institution, including those exported in the course of a commercial activity, and for which an input tax credit is not available.

What is export tax rebate (ETR)?

The provision of "export tax rebate (ETR)" refers to refunding the value-added, business, and special consumption taxes paid on export goods to encourage a nation's export trade ( Mah, 2007 ). ETR is an important subsidy instrument that leverages exports and plays a vital role in Chinese foreign trade ( Chen et al., 2006, Elena, 2004 ).

Why are export tax rebates important?

Export tax rebates are an important policy instrument for stimulating exports, which many developing countries make use of. However, excessive export tax rebates and inappropriate structural arrangements can lead to over-production in highly polluting industries and cause the environment to deteriorate.
