

Could the Falklands become an energy powerhouse?

The Falklands might seem an odd candidate to become an energy powerhouse. The likely presence of commercial quantities of oil has been known for decades, yet successful development has always seemed improbable. The Islands were too remote, the weather too inhospitable, the cost too high. Now, however, the odds are shortening.

How much electricity does the Falkland Islands use?

The Falkland Islands generates 19,000 MWh of electricity as of 2016 (covering 108% of its annual consumption needs). The Falkland Islands consumed 17,670 MWh of electricity in 2016. The Falkland Islands did not import any electricity in 2016. The Falkland Islands didn't export any electricity in 2016.

What is the Falkland Islands Environment Strategy 2021 - 2040?

The Falkland Islands Government is proud to launch its flagship Environment Strategy 2021 - 2040, which recognises the central and universal role that the natural environment plays in the sustainable development of our health and wellbeing, our economy and our nation as a whole.

Why is the environment important in the Falkland Islands?

The environment is essential for human existence. We rely on our ecosystems to provide us with clean water, air, food and shelter. In the Falkland Islands, the foundations of our livelihoods are reliant on our environment - our key sectors would not exist without our natural resources.
