

Will Hitachi energy supply a battery energy storage system in the Faroe Islands?

Image: SEV. Hitachi Energy has been selected to supply a large-scale battery energy storage system (BESS) for a wind farm in the Faroe Islands, as the remote archipelago targets a goal of 100% renewable energy. The North Atlantic islands, between Norway and Iceland and north of Scotland, are home to about 50,000 people.

Are there renewables in the Faroe Islands?

"In the Faroe Islands, we are blessed with renewables: we have wind, hydro and some sun in the summer; we also have tidal and wave power where we can see great potential," says Nielsen. Since announcing its green vision in 2014, SEV has already done a lot to increase the share of renewables in its energy mix.

Can the Faroe Islands be a smart microgrid?

"The energy system in the Faroe Islands is an impressive example of how all available energy resources can be integrated into a smart and innovative microgrid," says Vehkakoski.

Will the Faroe Islands use more green energy in 2025?

Even more conservative scenarios predict that the Faroe Islands' current electricity consumption of approximately 350,000 MWh per year will increase to approximately 450,000 MWh in 2025. "The current discussion recommends using more green energy and especially the potential for wind energy is quite high," says one of the islanders.

What is the main industry in the Faroe Islands?

Fishing is, and has been for many decades, the main industry in the Faroe Islands with its products, including farmed salmon, representing more than 95% of total exports, and around 20% of Faroese GDP. "Producing fish meal and oil requires quite a lot of energy."

Is the Faroes going green?

Nielsen is Head of R&D at Elfelagi; SEV, the publicly-owned, primary power-producer on the islands, and he has a clear vision: "Our future energy supply in the Faroes is green. We have set a goal of becoming 100% green by 2030 in terms of on-shore electricity."

The LIVOLTEK iPower HES Series is a premium all-in-one solar and storage solution that integrates a hybrid inverter with low-voltage batteries. This integration helps you reduce ...

To meet this challenge, SEV installed Hitachi Energy's e-mesh(TM) PowerStore(TM) Battery Energy Storage System (BESS), a 6.25 MW / 7.45 MWh battery that provides full backup for the Porkeri Wind Farm on the archipelago's ...

SEV, the Faroe Islands utility, has commissioned Europe's first fully commercial Li-ion energy storage

system (ESS) operating in combination with a wind farm. Saft's containerised solution is helping to maintain grid stability so that the ...

Hitachi Energy today announced that SEV 1, the power company serving the Faroe Islands, has selected an e-mesh™ PowerStore™ Battery Energy Storage (BESS) 2 solution as part of its ...

"Energy storage like this major battery plant at the ESB's flagship site in Poolbeg will be a core part of Ireland's new renewable energy transition," Eamon Ryan said. Eamon Ryan (centre) cuts the ribbon to ...

Hitachi Energy has been selected to supply a large-scale battery energy storage system (BESS) for a wind farm in the Faroe Islands, as the remote archipelago targets a goal of 100% renewable energy. The North ...

Hitachi Energy has installed a 6.25MW/7.5MWh battery energy storage system (BESS) in the Faroe Islands for utility SEV, with substantial benefits to a connected wind farm. The energy solutions arm of the large ...

Next to the wind park, SEV has installed a 2.3 MW lithium-ion battery, which was Europe's first wind-derived storage system when it was set up in 2016. In addition, potential pumped hydro-storage reservoirs are spread all over the ...
