

What is a whole-house generator?

When you lose power, a whole-house generator keeps your home's systems up and running. Some are permanently installed to power your home in an emergency, while others are portable for off-grid camping and mobile job sites. Finding the best generator for your home is just a matter of knowing what you're looking for.

How much power do you need for a home backup generator?

You will likely need at minimum a 10,000 Watt or 10kW generator to power a whole house. There are portable generators, that are cheaper than stationary home backup generators, in the 10,000 and 15,000 watt range. But likely, if you want a true home backup generator system, you will want a stationary generator in the 16,000kW and higher range.

Should you buy a whole-house generator?

If you decide to take the plunge for a whole-house generator, given your investment in installation, you'll want a unit that performs well, which is where our ratings come in. "A home standby generator does a great job of supplying backup power during an outage," says Dave Trezza, a test engineer who heads CR's generator testing program.

How long does a whole house generator take to restore power?

Sometimes, it takes more than a week for power to be restored. Luckily, we've found the 6 best whole house generators, so that you won't have to worry about finding yourself off the grid. Buying a whole house generator requires you to pay close attention to such specifications as the fuel type, power output, ease of installation and maintenance.

What is a home battery backup system?

Home battery backup systems, like the Tesla Powerwall or the LGES 10H and 16H Prime, store energy, which you can use to power your house during an outage. Batteries get that electricity from your home solar system or the electrical grid. As a result, they're much better for the environment than fuel-powered generators.

Which generator is best for a home?

Generac Guardian Wi-Fi Enabled Standby Generator: A modern generator with a 22-kilowatt capacity, it's capable of powering most homes. It comes with built in safety features and a Quiet Mode.
