

Are energy storage projects eligible for a refundable ITC?

Energy storage projects owned by taxable entities are not eligible for a refundable ITC, but instead can take advantage of the new transferability rules. The IRA added a provision to permit project owners (other than tax-exempt entities) to make an election to transfer the ITC to an unrelated third party.

Are energy storage projects eligible for a bonus credit?

Domestic Content - IRS Notice 2023-38 (May 12, 2023) An energy storage project (among others) is eligible for an "adder" bonus credit (generally an additional 10% ITC) if it satisfies US Federal Transit Administration-based "Buy America Requirements" for domestic content.

Do energy storage projects receive additional credit?

An energy storage project (among others) located in an "energy community" receives an "adder" additional credit (generally an additional 10% ITC). The energy community guidance provides definitional rules for each of the three categories of energy communities (Brownfield Category, Coal Closure Category, and Statistical Area Category).

Are energy storage projects exempt from prevailing wage and apprenticeship requirements?

Two exemptions from the prevailing wage and apprenticeship requirements exist: Smaller-scale energy storage projects (under 1MW of storage capacity) qualify for the 30% bonus rate regardless of compliance with the prevailing wage and apprenticeship requirements.

Are energy storage installations eligible for ITC?

Energy storage installations that are placed in service after Dec. 31, 2022, and begin construction prior to Jan. 1, 2025, are entitled to the existing ITC under Section 48 (a).

Is energy storage eligible for the IRA ITC?

Standalone energy storage is not eligible for this credit, but energy storage installed in connection with wind and solar projects may be eligible. In addition to all the changes for the ITC, the IRA also revised the Section 25D credit homeowners use for residential energy storage projects, such as batteries.

The reduction is mainly due to the retreat of Superbonus subsidy policy. Italy's energy storage structure is also dominated by residential storage, which accounts for more than 80% of new installations. In December ...

3 ???&#0183; Energy Minister George Papanastasiou said after the Cabinet meeting on Thursday that the scheme's first phase, worth EUR35 million (\$37 million), would be implemented initially ...
