

Who is Ges energy storage?

Independent energy storage company GES develops and operates first-class energy storage assets facilitating energy transition.

What does GES do?

GES is an independent energy storage company. We are developing and operating first-class energy storage assets to create a global terminal network. Our strategic focus is to facilitate the Energy Transition: we are developing the infrastructure needed for our customers to move towards ever more sustainable and low carbon energy use.

What are GES stationary storage systems?

04. GES stationary storage systems are characterized by the independence between the power and the energy module, offering the possibility to design battery storage solution adapted to the final application requirements. Besides, the modular structure of the systems permits to scale the entire system up to megawatt sized solutions.

What is Ges doing in Rotterdam?

GES is developing a multi-client, multi-product terminal in Rotterdam, able to import both refrigerated ammonia and compressed hydrogen, with redeliveries into barges, rail, truck and the H2 grid (HyNetwork) operated by Gasunie.
