

Who is developing a 500 MW solar project in Bhutan?

Another 500 MW of solar projects will be developed by Tata Power Renewable Energy Ltd., a subsidiary of Tata Power, it said. This partnership aligns with Bhutan's vision for its energy sector, which aims to increase its overall generation capacity to 25,000 MW by 2040, ensuring energy security and promoting regional energy integration.

What is Tata Power doing in Bhutan?

Tata Power has joined forces with Druk Green Power Corp. to develop 5,000 MW of clean energy capacity in Bhutan. This includes large-scale hydropower and solar projects aimed at supporting Bhutan's energy goals and regional integration.

Why is DGPC partnering with Bhutan?

DGPC MD Dasho Chhewang Rinzin said that this collaboration aligns with Bhutan's aspirations to maximise benefits for its people by fast-tracking the development of renewable energy resources to achieve economic development and long-term energy security.

How does Bhutan achieve a sustainable future?

Bhutan aims to achieve this goal by diversifying its energy portfolio beyond traditional hydropower to include solar and geothermal energy while exploring innovative project structures and financing through strategic partnerships.

What is Bhutan doing to diversify its energy mix?

The development is part of Bhutan's plans to diversify its energy mix beyond traditional hydropower to include solar and geothermal sources. The strategy involves diversifying project structuring and financing through strategic partnerships. This collaboration is supported by the governments of Bhutan and India.

Why is Bhutan partnering with India?

This partnership aims to enhance regional energy security while supporting the transition to renewable energy in both Bhutan and India. The partnership is in line with Bhutan's vision to expand its total energy generation capacity to 25,000 MW by 2040.

Bhutan plans to achieve this target through diversification in its energy portfolio beyond traditional hydropower, which would include solar and geothermal energy. This will extend to diversifying ...
