

How can Mozambique contribute to a green energy transition?

Studies have indicated that this could a 60% reduction in the country's aluminium exports and a 2.5% decrease in the country's GDP. On the other hand, Mozambique also has unrivalled natural energy resources that could significantly contribute to a green energy transition, not only domestically but also in the Southern African region.

What will Mozambique do at COP27?

At COP27, the government of Mozambique supported by NDC Partnership, the Tony Blair Institute for Global Change and Enabel will host a panel discussion to highlight the significant role the country's unique renewable energy assets can play in the domestic, regional and global energy transition.

Should Mozambique be included in the energy transition debates at COP27?

When unattended, however, it is estimated that the country's energy sector emissions could increase fivefold from 17 MtCO_{2e}/year in 2020 to almost 85 MtCO_{2e} by 2050. And there are more reasons why ignoring countries like Mozambique in the energy transition debates at COP27 might be ill-advised.

What is the 'brief - renewables in Mozambique 2022'?

The 'Briefing: Renewables in Mozambique 2022' is a document that compiles and organises the most relevant and current information of the renewable energy market in Mozambique. The latest edition of the Brief was launched on December 7th, during the 'Business Conference - Renewables in Mozambique 2022'.

Is Mozambique a low emitting and energy-poor country?

Mozambique exemplifies the case of a typical low emitting, energy-poor country. Historically, Mozambique has contributed less than 0.01% of global emission since 1750, and in 2022 less than half of the population had access to modern electricity services.

When is the RFQ deadline for solar PV & Bess parks in Mozambique?

The submission deadline for the Request for Quotation (RFQ) for Solar PV and BESS Parks in Mozambique has been extended to November 11th. GET FiT Mozambique aims to enable a favorable policy, legal and transparent regulatory framework for renewable energy and battery energy storage service IPPs in Mozambique.

the underrepresentation of wind and solar energy projects in the current project portfolio. Secondly, the lack of a green agenda among the key actors from both ends is deeply rooted in a scepticism about renewable energy, compared to the well-established appreciation of conventional energy sectors and their project development models.
