

Why did Terra Solar Philippines get a Green Lane certificate?

The accreditation will facilitate easier approval and processing of permits. The Board of Investments of the Philippines has issued a green lane certificate to Terra Solar Philippines for an under-construction project that has been touted as the world's largest solar array. The certification aims to streamline development.

Will floating solar panels be a fixture in the Philippines' largest lake?

MANILA, Philippines -- Floating solar panels will soon be a fixture in the Philippines' largest lake if the project reaches fruition, with expectations to benefit from an endorsement under the country's new "green lanes" for investments. These "lanes" are expected to smoothen out kinks in doing business in the country.

Who is Green Lantern solar?

Founded in 2011 on the principles of teamwork and trust, Green Lantern Solar is committed to delivering a clean energy future. We provide sustainable energy access to businesses, educational institutions, towns and municipalities throughout the U.S.

Why should you choose Green Lantern solar?

At Green Lantern Solar, we help communities preserve their land while generating sustainable energy locally. We ensure our solar installations are set back from roads, minimize construction waste and help farmers generate additional revenue to keep their farms in operation.

How much does a solar project cost in the Philippines?

The certification aims to streamline development. The PHP 185.28 billion (\$3.25 billion) project is set to feature 3.5 GW of solar panels and a 4.5 GWh battery energy storage system. It will span 3,500 hectares across the provinces of Nueva Ecija and Bulacan. A groundbreaking ceremony took place at the start of this year.

How much solar will the Philippines have in 2023?

According to figures from the International Renewable Energy Agency, the Philippines had 1.7 GW of deployed solar at the end of 2023. Authorities have forecast up to 2 GW of new solar could be added this year. This content is protected by copyright and may not be reused.
